

Die Cut Example

(See following pages)

FINISHED CUT SIZE

This represents the final size and shape after cutting.

See next page for artwork with bleed.

Need help setting up your file?

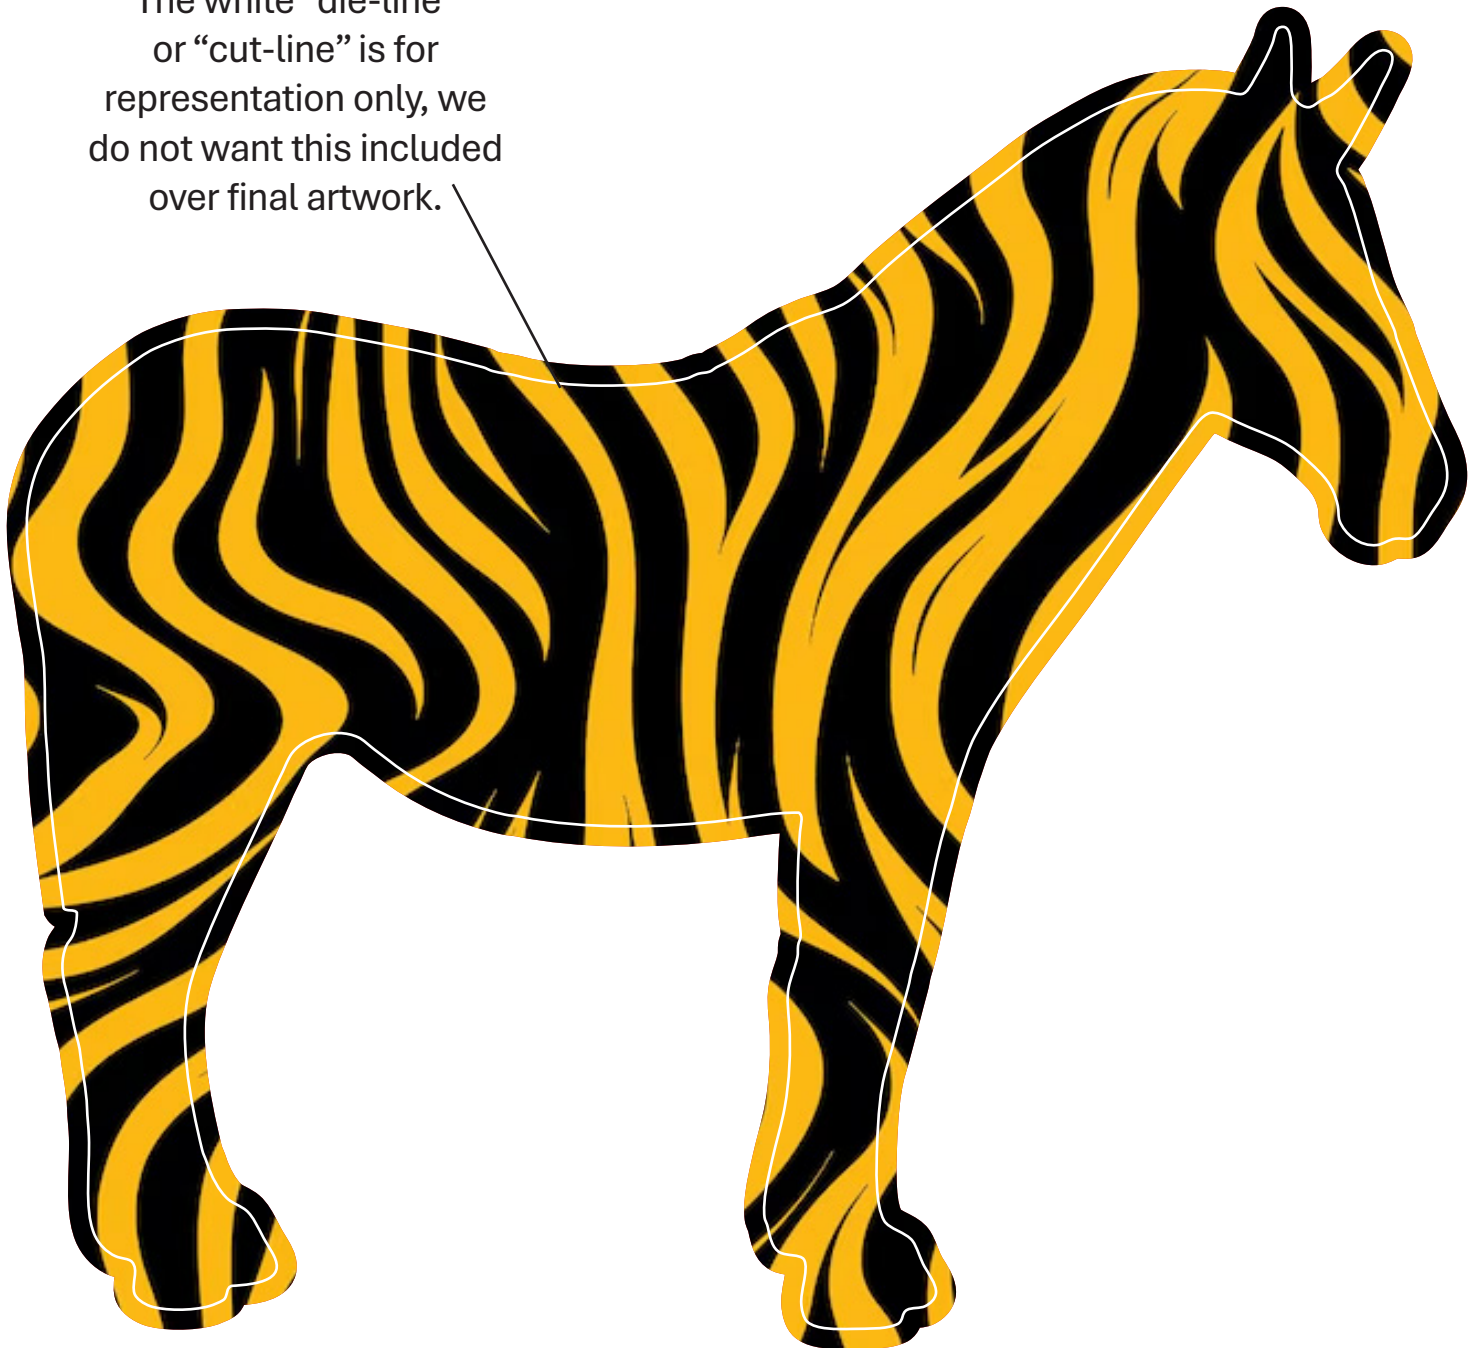

XPress Copy offers design and prepress services. Contact us if you need assistance preparing your artwork.

ARTWORK WITH BLEED

Artwork must extend beyond the finished cut size.

The extended area will be trimmed away during production and helps prevent unwanted white edges.

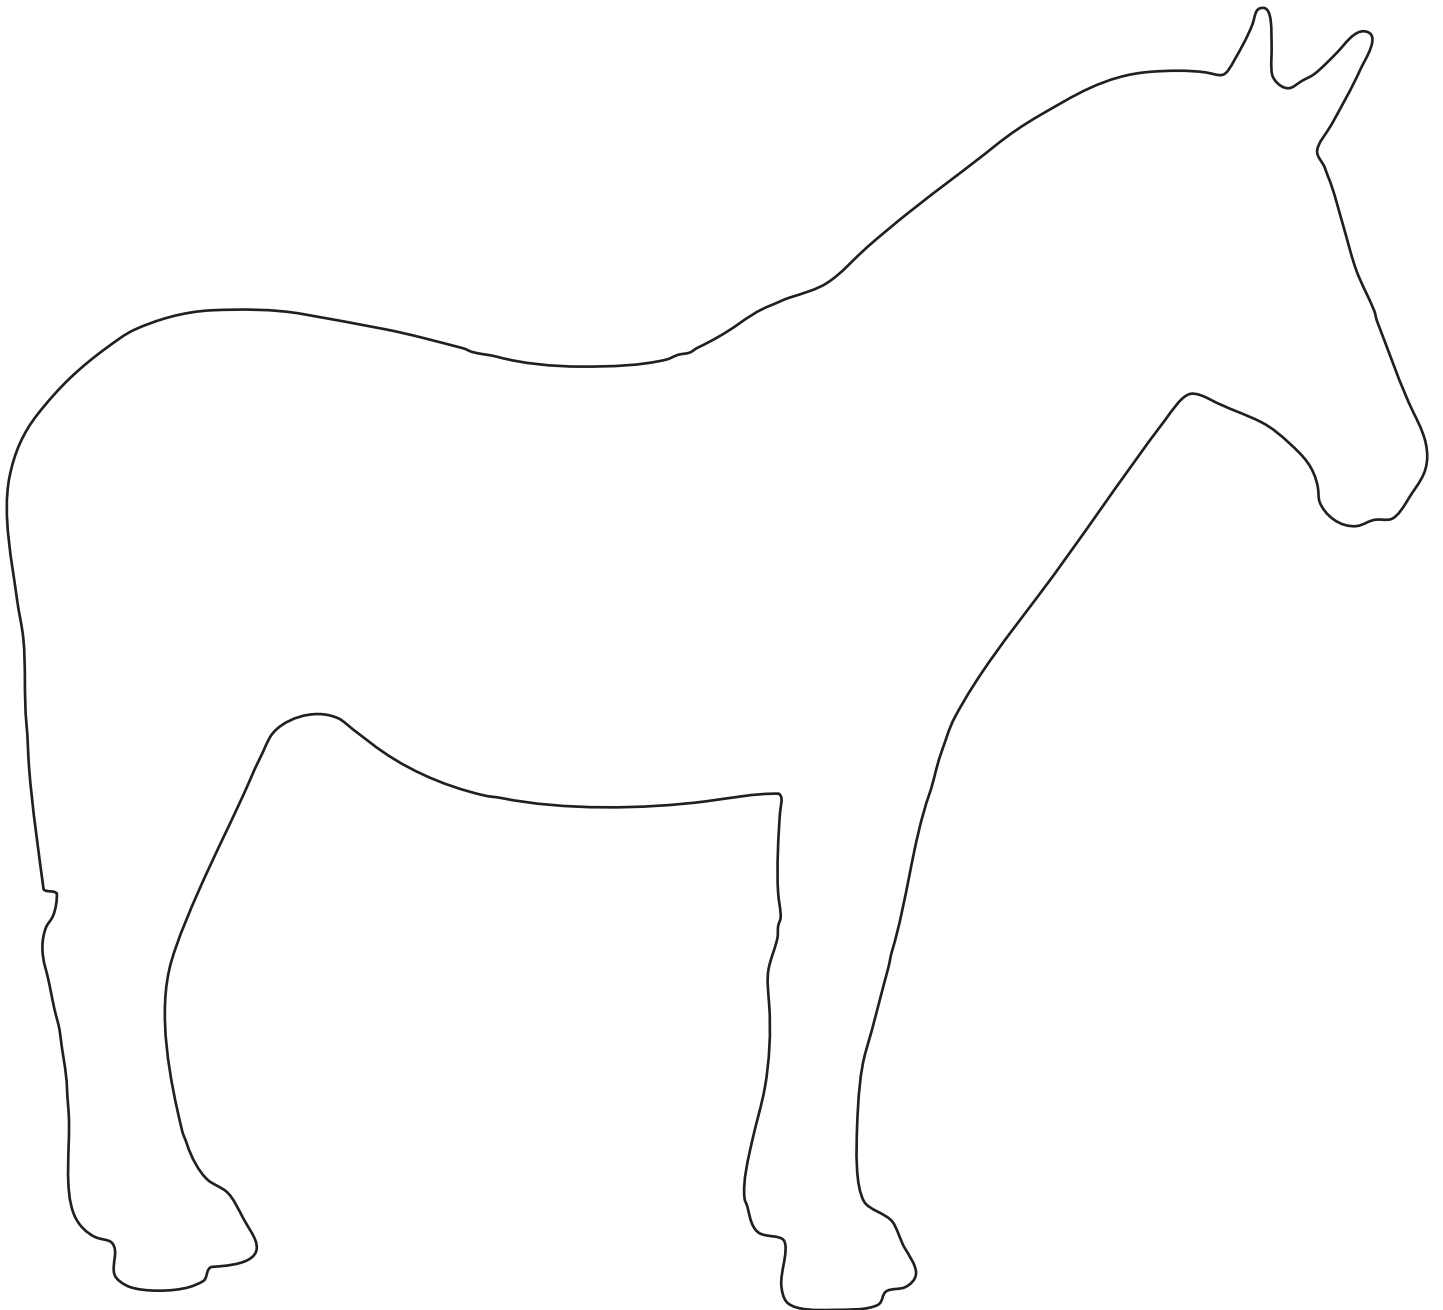

The white “die-line” or “cut-line” is for representation only, we do not want this included over final artwork.

CUT LINE

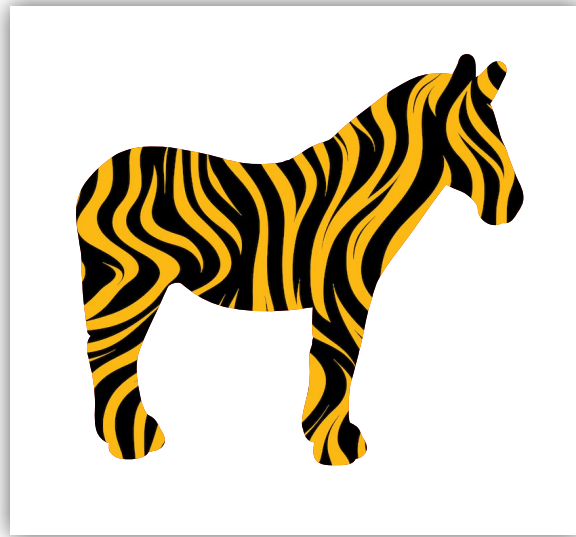

Provide the cut line on a separate page or layer aligned exactly to the artwork with bleed.

Do not place the cut line on the printable artwork unless you are providing us with layered/native files.

ONCE DESIGNED - PLEASE SEND 2 PAGES
